- Class 2 - Kealan Mc
- Class 3 - Tobi-Jaye B
- Class 4 - Jon Y
- Class 5 - Willow M
- Class 6 - Arianna D
- Class 7 - Anthony H
- Class 8 - Blosson K
- Class 9 - Maya B
- Class 10 - Max F
- Class 11 - Toby SB
- Class 12 - Viktor Y

WELCOME BACK

Welcome back and Happy New Year! We hope that you all had a fantastic festive holiday and we have enjoyed welcoming the children back this week. It was lovely to see their enjoyment when the pantomime came to visit on Monday afternoon.

Many thanks for your patience this week for the changes we made to the morning and afternoon routines due to the icy conditions. Fingers crossed we will be back to normal next week. If not, we will alert you via text and Facebook of any changes.

Unfortunately, for safety reasons and staggered starts, we needed to postpone Thursday's Stay & Learn for year 3/4. This will now be held on **Tuesday 21st January at 9:00am.**

10 Top Tips for Parents and Educators

SAFETY ON SOCIAL MEDIA

Currently, children are growing up in an immediate and throwaway culture when it comes to content that's consumed online. So much material is now deliberately created to be shorter in nature – and may often contain hidden elements such as advertising, or extreme political and cultural views. With complex algorithms built to keep people on their phones and engaging with social media content, it's becoming increasingly difficult to reduce time spent on these platforms.

1 REDUCE DOOMSCROLLING

It's concerning how common it is for young people to spend hours 'doomscrolling': trawling through social media and aimlessly viewing every post they see, many of which might make them feel sad or anxious. Social media can be useful for keeping in touch with friends and family, as well as staying up to date on current events. However, it's important to use it with a clear purpose, instead of endlessly scrolling through content, which could lead to young people accidentally discovering harmful material.

2 TALK ABOUT THE CONTENT

It's important to keep apprised of the kind of content that a young person is being exposed to. Discussing what they're watching online can help you understand why they're using social media in the first place. Furthermore, ensure that children are aware of hidden content, such as advertising of a product – and that they know how to spot that the creator is being paid to talk about it.

3 FIND POSITIVE ASPECTS

Despite all the concerns, there's plenty of wholesome content on social media. It's worth spending time with children to help them find something suitable and enjoyable. Perhaps you'll even discover a joint interest, and you can enjoy the content alongside the child. As part of this, you should also point out why certain things shouldn't be given attention, explaining why it isn't suitable and why it's been created in the first place.

4 REDUCE SCREENTIME

Young people can sometimes be unaware of the exact amount of time they spend looking at social media. Smart phones don't just have the capacity to monitor screentime; they also record how much time is spent on each app. Consider setting targets to reduce this and support children to meet these goals, gradually reducing the amount of time spent on different apps.

5 FILL THE VOID

Monitoring and reducing screentime can create a lot of free time to fill, and young people can even face withdrawal symptoms when made to step away from their phones. To mitigate this, consider what offline activities you could introduce the child to, and what they would enjoy. This can ensure that young users will permanently cut down on their screentime, rather than temporarily doing so while they know it's being monitored.

6 REDUCE NOTIFICATIONS

One way in which social media platforms keep people coming back is through notifications. The algorithms behind these apps track people's daily habits, including the times of the day where they're most likely to engage with the platform. This data is then used to deliver specifically timed notifications to draw them back in. To avoid young users being exposed to this tactic, simply turn off notifications for the app in their phone's settings.

7 LIVE IN THE REAL WORLD

Overexposure to social media can distort someone's perception of the real world – from body norms to social conventions. This filtered environment can make it hard for young people to distinguish reality from online content, which is now becoming even more difficult with the rise of AI. To mitigate this concern, take time to teach young people how to discern truth from fiction, both on and off social media.

8 DIGITAL DETOX

Encouraging young people to take a 'digital detox', from even just a couple of the apps that they use, can result in an overall reduction of screentime and less exposure to potentially harmful content. Alternatively, rather than avoiding the app entirely, encourage children to take a 'digital detox' from content creators and influencers, and instead, keep in touch with friends and family – which is generally a far healthier use of these platforms.

9 MODEL GOOD BEHAVIOUR

Consider the habits that you're demonstrating to your children. How much time do you spend on your phone? How much do you 'doomscroll'? Comparing your own usage with the child's could put things into perspective for them – or if it turns out that you're also overusing social media, it can turn screentime reduction into a joint mission, which you and the child can work on together.

10 BE CLEAR ON THE "WHY"

Research shows that young people can become addicted to social media. There are many schools that are moving towards being 'phone free' due to the negative impacts of using social media and phones continuously. It's important to explain to young people why managing screentime is important. Set out the benefits and ensure they have all the relevant information, so it's not just seen as a punishment.

Meet Our Expert

John Inasley is a senior leader in a Birmingham secondary school and has vast experience in leading schools over the past 15 years – including the development of computing curriculums across primary and secondary schools, writing e-safety policies and supporting schools with computing and e-safety advice.

What Parents & Educators Need to Know about JUSTALK KIDS

WHAT ARE THE RISKS?

JusTalk Kids is a child's version of the JusTalk app – a highly popular social networking platform – designed for users up to 13 years of age, allowing them to video call, message and participate in group chats. While adults can link their own JusTalk account to their child's and make use of parental controls, it's important to understand the risks associated with the app.

SUBSCRIPTION FOR PREMIUM ACCESS

While JusTalk Kids is free, there's the option to subscribe to a kids' premium account or a premium family account. At a cost, this feature allows children to have access to more fun features such as games they can play with others in a call; exclusive stickers; a badge denoting them as a premium subscriber; and exclusive ringtones and themes.

RESISTANCE TO CONTROLS

JusTalk Kids endeavours to allow children the sense of having a chat-based app while allowing parents to set controls (within the app or from their own adult JusTalk account). The basis behind this is positive; however, some children are challenging their parents by refusing to use JusTalk Kids, preferring to use the adult version without any restrictions in place.

KNOWING THE PARENT PASSCODE

After downloading JusTalk Kids, parents can set a passcode which users must enter to add contacts. The parental controls help to manage which content can be viewed and who children can add as a contact: this then allows children to chat with friends in a controlled environment. However, prospective contacts don't have to know a specific username. In theory, someone could type in a random name and then add them as a friend.

POTENTIAL DATA LEAKS

JusTalk and JusTalk Kids claim to be secure and encrypted, going so far as to state that even the developers themselves won't access your data. However, a security lapse in 2022 highlighted that messages were not in fact encrypted – leading to concerns around the security of the app and the transparency of the development team.

CYBERBULLYING

Online chats can provide a sense of anonymity, leading some users to post things which they wouldn't normally say in person. Combined with the option of group chats, there's a risk that young people might join in with this kind of behaviour, escalating it further and potentially turning what should be a fun experience into something deeply negative.

TOO MUCH SCREENTIME

A report by the UK Parliament Education Committee highlighted a 52% increase in children's screen time between 2020 and 2022 – as well as finding that 25% of children used their smartphones in a manner consistent with screen addiction. Introducing children to social networking apps when they're too young can lead to bad digital habits and a reliance on technology from an early age.

Advice for Parents & Educators

JUSTIFY THE CONTROLS

If parents allow their child to use JusTalk Kids, they should explain that they're putting parental controls in place to make the app safer. Make sure the child knows not to put their full name on the account and doesn't use a photo of themselves as their profile picture. This type of open discussion will help to ensure that a child is aware of the app's potential risks and knows how to reduce them.

TALK ABOUT ONLINE FRIENDSHIPS

Young children could be excited to use this app. However, highlight that they must do so in a positive, respectful and responsible manner. While it can be easy to get caught up in a group chat, it's important to talk to others politely and call out any unpleasant behaviour. Discuss the importance of limiting their contacts to people they know in real life and use parental controls to enforce this.

DOS AND DON'TS OF SHARING

Some children might not understand the potential dangers of oversharing online. Set clear guidelines around what *is* and *isn't* safe to share on the internet, and discuss the concept of a digital footprint. Children need to understand that the things they say and share online can never be completely erased. Even if they delete it themselves, it can be saved and distributed by others.

ENCOURAGE OPEN COMMUNICATION

Apps like JusTalk can sometimes lend themselves to bullying behaviours. Parents should monitor what their child is sending and receiving, check in with them regularly and encourage them to share their feelings (both positive and negative) at home. Remind them that they can block a contact if someone is treating them disrespectfully.

Meet Our Expert

Dr Claire Sutherland is an online safety consultant, educator and researcher who has developed and implemented anti-bullying and cyber safety policies for schools. She has written various academic papers and carried out research for the Australian government comparing internet use and sexting behaviour of young people in the UK, USA and Australia.
